第七章 搭建后台

1. 创建资源控制器AdminController

   在cmd 项目目录下执行 php artisan make controller Admin/AdminController --resource

2. 路由代码

   Route::resource("/admin","Admin\AdminController");

3. 控制器代码

```php
1   <?php
2
3   namespace App\Http\Controllers\Admin;
4
5   use Illuminate\Http\Request;
6   use App\Http\Controllers\Controller;
7
8   class AdminController extends Controller
9   {
10      /**
11       * Display a listing of the resource.
12       *
13       * @return \Illuminate\Http\Response
14       */
15      public function index()
16      {
17          //
18          //加载后台模板
19          return view("Admin.Admin.index");
20      }
21
22      /**
23       * Show the form for creating a new resource.
24       *
25       * @return \Illuminate\Http\Response
26       */
27      public function create()
28      {
29          //
30      }
31
32      /**
33       * Store a newly created resource in storage.
34       *
35       * @param  \Illuminate\Http\Request  $request
36       * @return \Illuminate\Http\Response
37       */
38      public function store(Request $request)
39      {
```

```php
40          //
41      }
42
43      /**
44       * Display the specified resource.
45       *
46       * @param  int  $id
47       * @return \Illuminate\Http\Response
48       */
49      public function show($id)
50      {
51          //
52      }
53
54      /**
55       * Show the form for editing the specified resource.
56       *
57       * @param  int  $id
58       * @return \Illuminate\Http\Response
59       */
60      public function edit($id)
61      {
62          //
63      }
64
65      /**
66       * Update the specified resource in storage.
67       *
68       * @param  \Illuminate\Http\Request  $request
69       * @param  int  $id
70       * @return \Illuminate\Http\Response
71       */
72      public function update(Request $request, $id)
73      {
74          //
75      }
76
77      /**
78       * Remove the specified resource from storage.
79       *

81       * @return \Illuminate\Http\Response
82       */
83      public function destroy($id)
84      {
85          //
86      }
87  }
88
```

4. 在resource/Views/Admin目录下新建模板Admin/index.blade.php 模板代码如下

```
1   @extends("Admin.AdminPublic.public")
2   @section('admin')
3   <h1>后台首页</h1>
4   @endsection
5   @section("title",'后台首页')
```

5. 在resource/Views/Admin目录下新建AdminPublic/public.blade.php代码如下

```
